

Heating Insulator G 1" × 80 mm

The Heating Insulator acts as a temperature barrier between sight tube and Flame Scanner / Compact Flame Controller.

It reduces the temperature transfer and protects in particular the Flame Scanner / Compact Flame Controller.

Due to the special material the insulator is also suitable for potential isolation between Flame Scanner / Compact Flame Controller and burner.

1 | Technical data

Flame orientation	axial
Dimensions	G 1" × 80 mm
Connection	20 mm G 1" female thread, both sides
Operating temperature	-60 °C up to +260 °C
Weight	approx. 0.06 kg
